

[illegible]

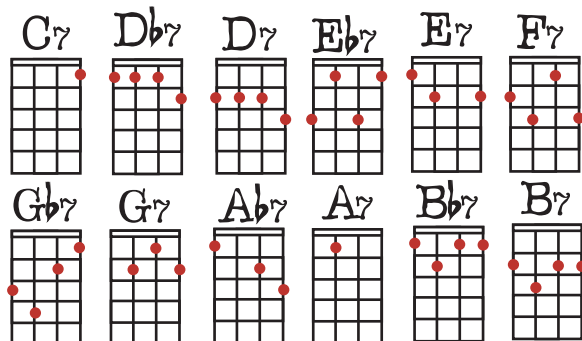

- 1 Print all three pages (preferably in colour to keep the fingering dots in red).
- 2 Cut out the circles and the "Cut this out" markings on the front cover.
- 3 Lightly glue page two and three back to back (in any orientation).
- 5 Have the front cover and the page 2 & 3 combination laminated in clear plastic. Print shops and service bureaus can do this for a couple dollars per page.
- 6 Punch a hole through the two disks at their centres.
- 7 Fasten the two disks together at their centres by a split-pin, grommet or eyelet. I use an eyelet. That works.
- 8 Go find some poor, unaccompanied soul and help them out.
